

BODY GLOVE SAFETY™ BRIEF

V-Line Plano Safety Eyewear with cord retainer & soft drawstring case

Tough polycarbonate lenses protect the eyes from debris injuries and provide 99% protection from UVA and UVB radiation.

our exclusive hinge pads enhance side shield protection

8-base curve single lens design offers affordable, stylish clarity with minimal distortion. Eyewear meets ANSI Z87.1+ (high-impact). H2 scratch-resistant coating provides long life.

Patented foam rubber pads at the temples and frame interior enhance side-shield protection and fit. Desert camouflage, black and white, or coordinated tan or gray neoprene insets run along the temples and allow glasses to float, just like traditional Body Glove surfer's specs.

Glasses come with soft drawstring case and cord retainer with quick-release safety clips. Replacement black neoprene keeper strap also available. (Part no. 90213)

BGS neoprene keeper strap
